

BRUSHLESS VOLTAGE REGULATORS / VARIATORS

Power outputs

25 - 800 kVA

Input Voltages

230 - 1000V

Output voltages

0÷460V 0÷2000V

Sectors

Marine / Industrial

Mosto common applications

Test rooms / Shipyards

These regulators best fit in applications where it is necessary to regulate an AC voltage different from the mains.

Compared to other technologies used, this solution gives the following benefits:

- easy to use
- good voltage waveforms
- no maintenance required

ROTATING FREQUENCY CONVERTERS

Power outputs	25 - 800kVA
Voltages	230 - 1000V
Input/Output frequencies	50/60Hz
Sectors	Marine / Industrial
Mosto common applications	Test rooms / Shipyards

These converters are made of rotating asynchronous machines in applications where it is necessary to vary the frequency of the AC voltage to a different value from the mains.

Strength points:

- easy to use
- robustness and durability (no on-board electronics)
- High degrees of protection on request
- Reduced maintenance

B MOTOR SERIES

Standard configuration

IP Index of Protection	IP23 or IP54, depending on the requested power output
Duty	S1
Ambient temperature	-20°C / +40°C

SPECIAL SOLUTIONS

We customize these products according to the characteristics of the system and the application.
